

Arvind Mer

Arvind is an Assistant Professor at the Faculty of Medicine and investigator, Ottawa Institute of Systems Biology, University of Ottawa. He received his Ph.D. from the Max Delbrück Center for Molecular Medicine, Germany. As a postdoc, he worked at the Karolinska Institute in Sweden and the Princess Margaret Cancer Centre in Toronto. Using machine learning, he has developed computational tools to identify drug response biomarkers in data from cancer model systems and has identified novel subtypes of cancer. His group at the University of Ottawa focuses on developing machine learning and artificial intelligence techniques for high-throughput omics data analysis.
